PROFESSIONAL SUMMARY

- Motivated and detail-oriented aspiring Computer Engineer with a strong academic foundation and hands-on exposure to Python development, NLP-based applications, AI assistants, web technologies, problem solving, and software development fundamentals.
- Skilled in building academic projects involving Natural Language Processing, automation, speech-based systems, and modular programming.
- Seeking opportunities as a Software Engineer Intern, Python Developer Intern, Web Developer Intern, or AI/ML Intern to apply technical knowledge in real-world development environments.

TECHNICAL SKILLS

- Programming Languages: Python, Java
- Web Technologies: HTML, CSS, JavaScript
- Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, Competitive Programming
- Databases: Basic SQL, Database Design and Management
- Tools & Platforms: Git, GitHub, VS Code, MS Office, Google Workspace
- AI / ML: Basics of Artificial Intelligence, Machine Learning Fundamentals, NLP Basics, Deep Learning Fundamentals
- Additional Strengths: Communication Skills, Critical Thinking, Logical Reasoning, Leadership, Video Editing, Web Development

EDUCATION

Lingaya's Vidyapeeth, Faridabad | Bachelor of Technology | 2023 – 2027

Eicher School, Faridabad | Senior Secondary, CBSE Board | Completed 2023

ACADEMIC PROJECTS

AI Chatbot using NLP

- Developed a Python-based AI chatbot to process user queries and generate contextual responses using Natural Language Processing techniques.
- Applied tokenization, lemmatization, stop-word removal, intent classification, and response optimization to improve conversational accuracy.
- Worked with tools and libraries such as NLTK, spaCy, and scikit-learn while maintaining a modular and scalable code structure.

Jarvis AI Assistant

- Built a voice-controlled AI assistant in Python for system automation and web-based task execution.
- Implemented speech-to-text, text-to-speech, command recognition, and intent handling for interactive task management.
- Improved usability through error handling, fallback responses, offline functionality, and modular programming logic.

CERTIFICATIONS

- Generative AI: Working with Large Language Models
- TensorFlow: Practical Skills in Constructing, Training, and Optimizing Models
- PyTorch Essential Training: Deep Learning
- Building Deep Learning Applications with Keras
- Deep Learning: Getting Started
- Introduction to Cybersecurity

AREAS OF INTEREST

- Software Development, Artificial Intelligence and Machine Learning, Data Structures and Algorithms, Web Development, Database Design and Management, Open-Source Technologies, Problem Solving, Competitive Programming, Reading Technology Blogs, Learning Emerging Technologies, Listening to Music, Playing Sports, Reading.
